

# PALLET RACKING

Selecting the correct pallet racking system to suit your individual requirements will provide you a safe, efficient and cost effective solution.

Industor pallet racking systems have been designed and tested in Australia to fully comply with Australian Standard 4084-2012 and meet structural analysis requirements while satisfying other standards.

The extensive adjustability and range of optional components ensures we can supply an individual solution to store your products for operational efficiency.

Qualified rack inspectors ensure that your warehouse racking stays compliant with government and insurance underwriter requirements with mandatory annual inspections..

## RACKING SYSTEMS

### Selective -

- 100% immediate accessibility
- 40% floor utilisation\*
- Good stock rotation
- Infinitely adjustable
- Accessories available

### Double Deep -

- 50% immediate accessibility
- 60% floor utilisation\*
- Average stock rotation
- Reach truck operation

### Drive-In -

- 25% immediate accessibility
- 65% floor utilisation\*
- Poor stock rotation
- High density system

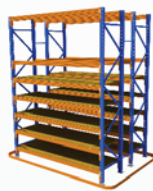

### Pushback -

- 25% immediate accessibility
- 65% floor utilisation\*
- Moderate stock rotation
- High density system

### Narrow Aisle -

- 100% immediate accessibility
- 45% floor utilisation\*
- Good stock rotation
- Stock picking system

### Cable -

- 100% immediate accessibility
- 40% floor utilisation\*
- Cable drums up to 2000kg
- High density system

### Other systems -

- Shuttle racking
- Drive-through racking
- Flow through racking
- Conduit racking
